

FIG. 2

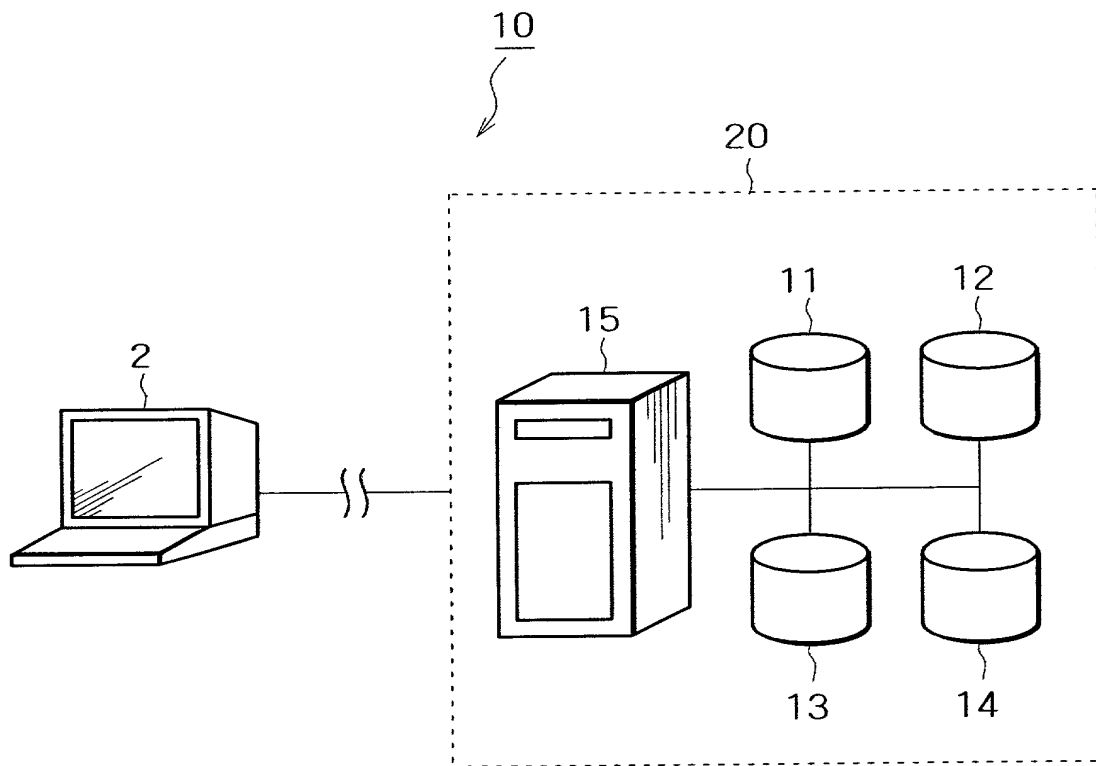

FIG. 3

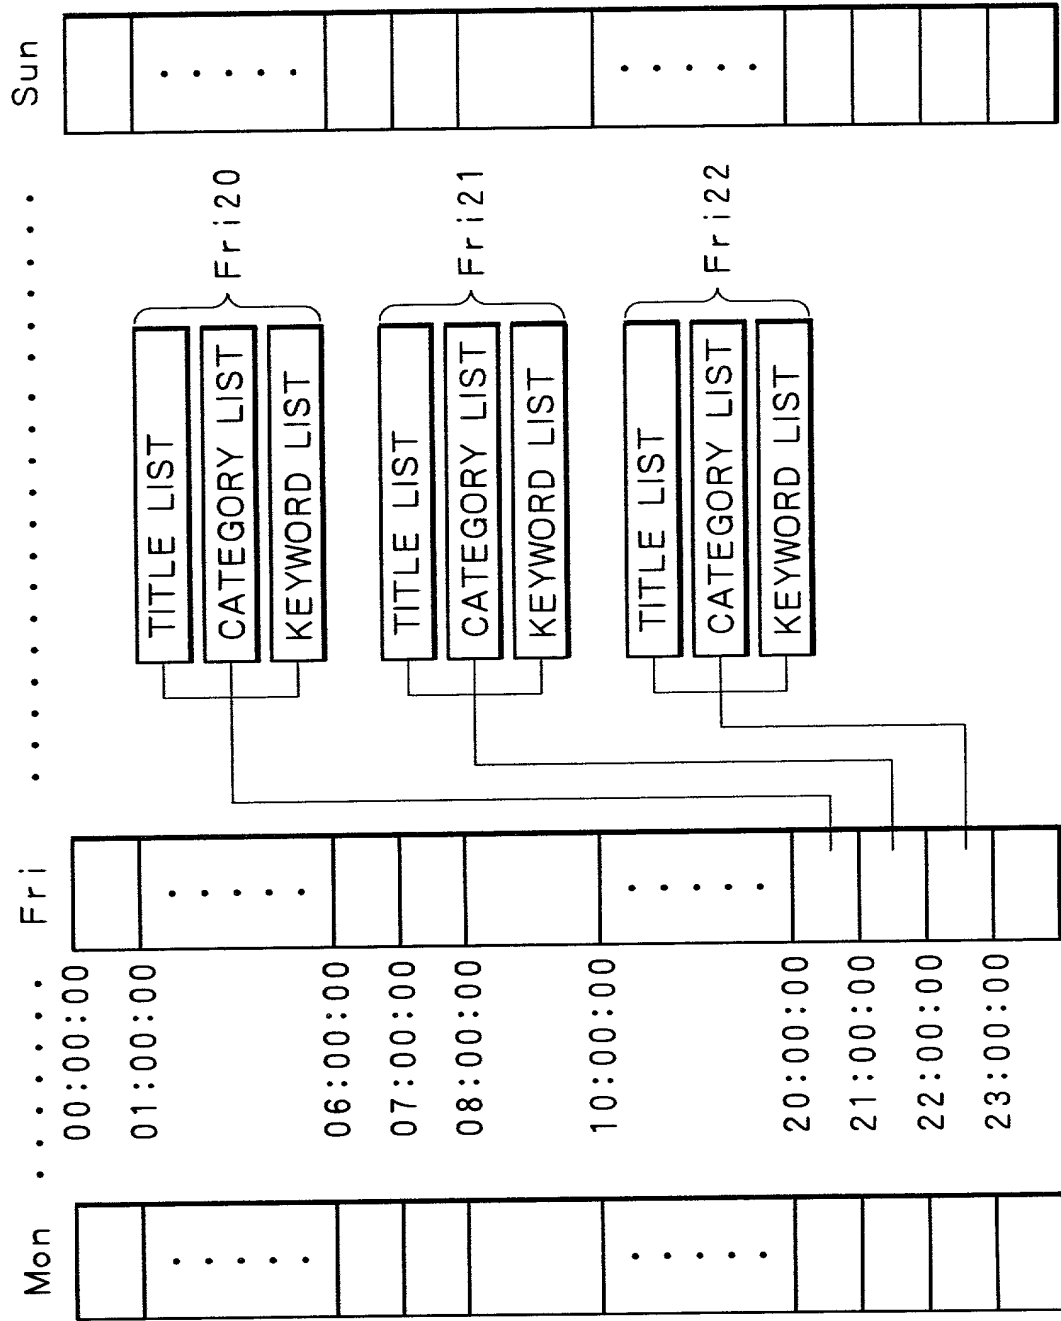

FIG. 4

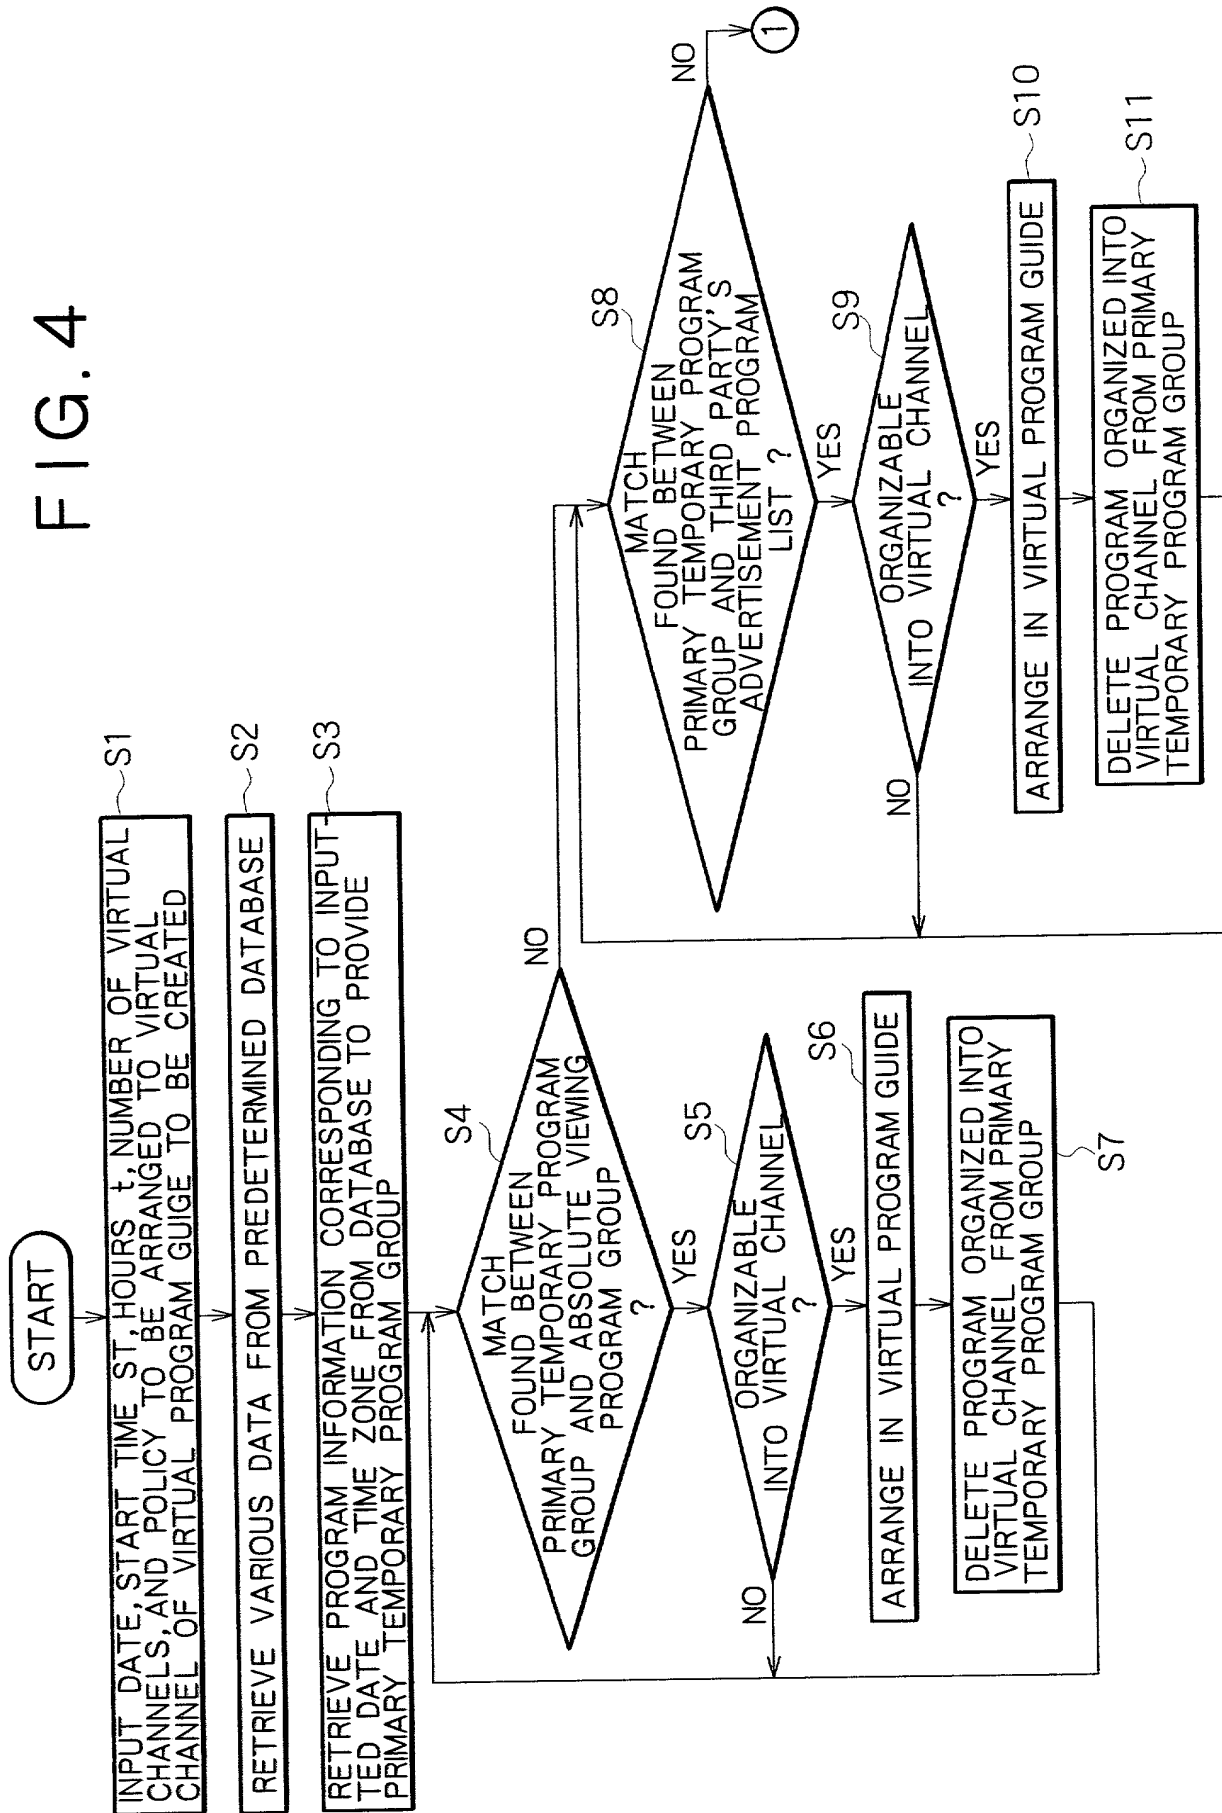

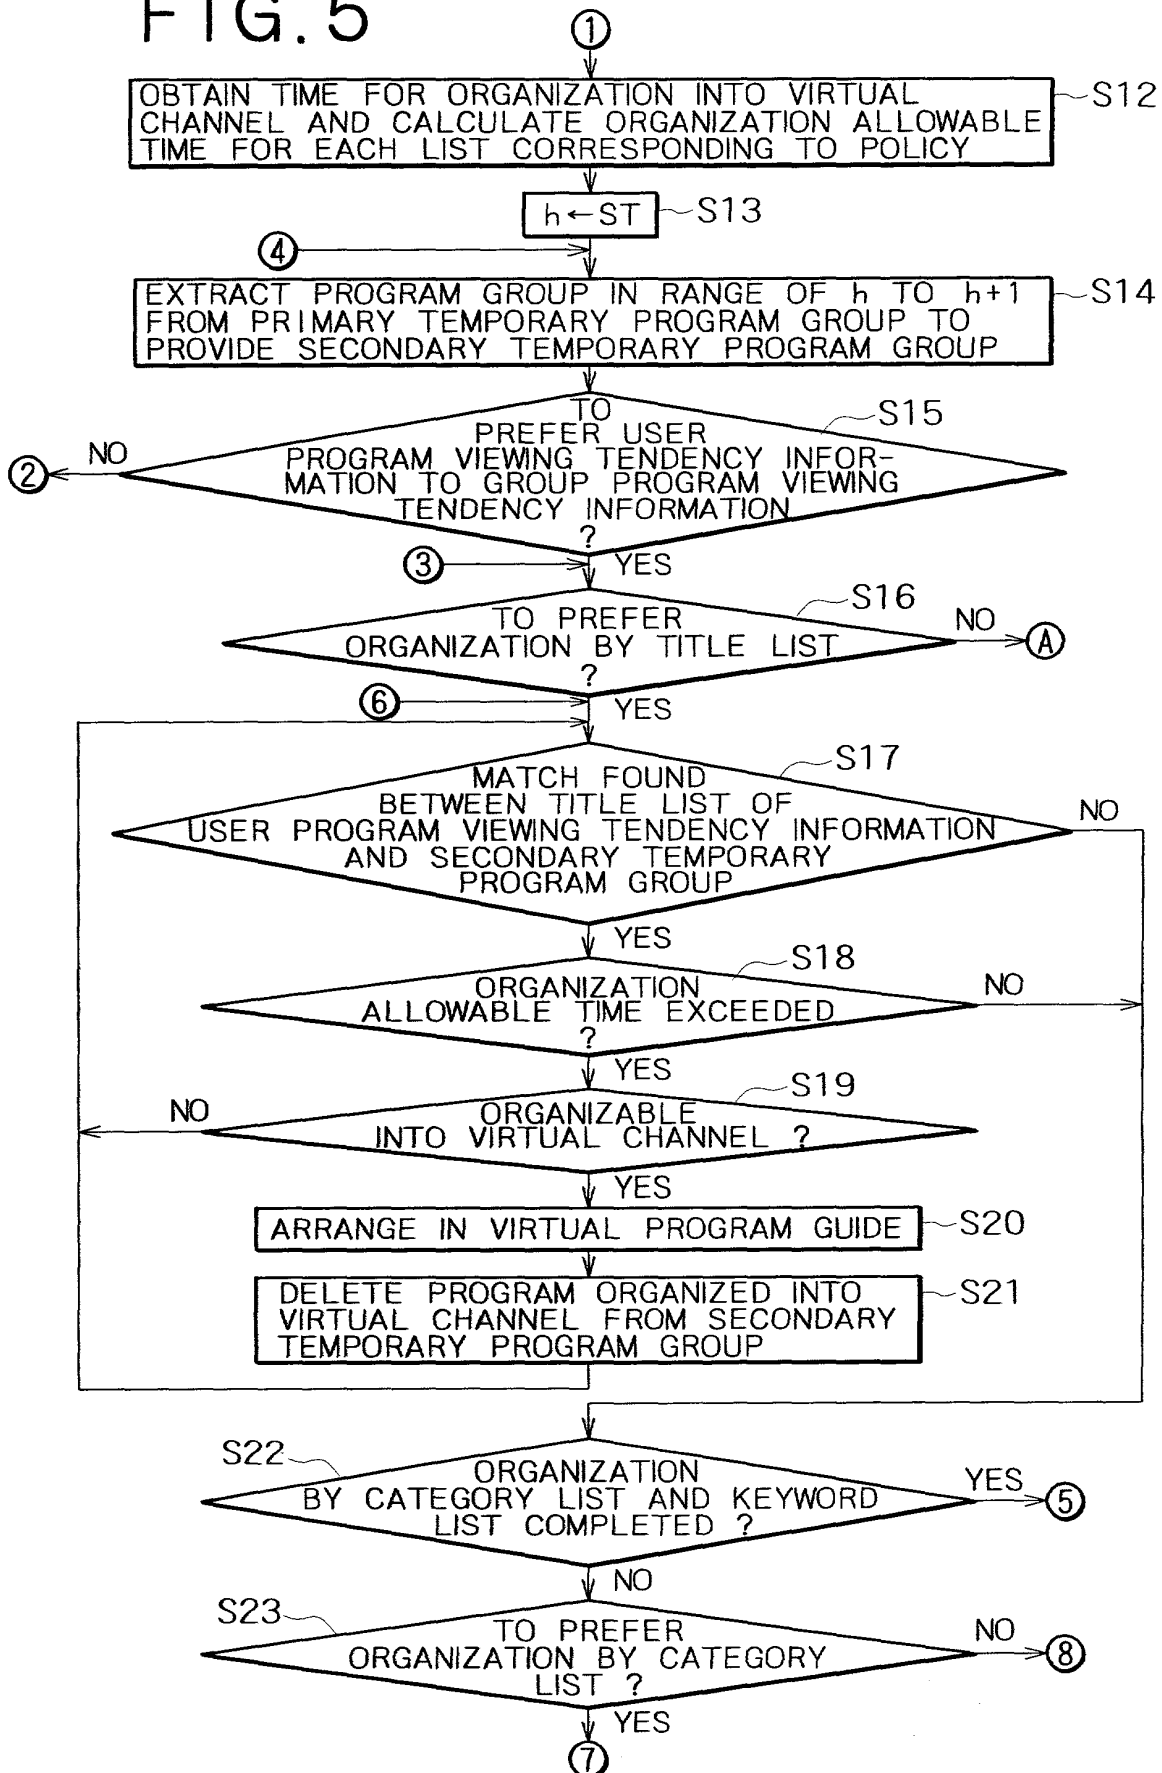

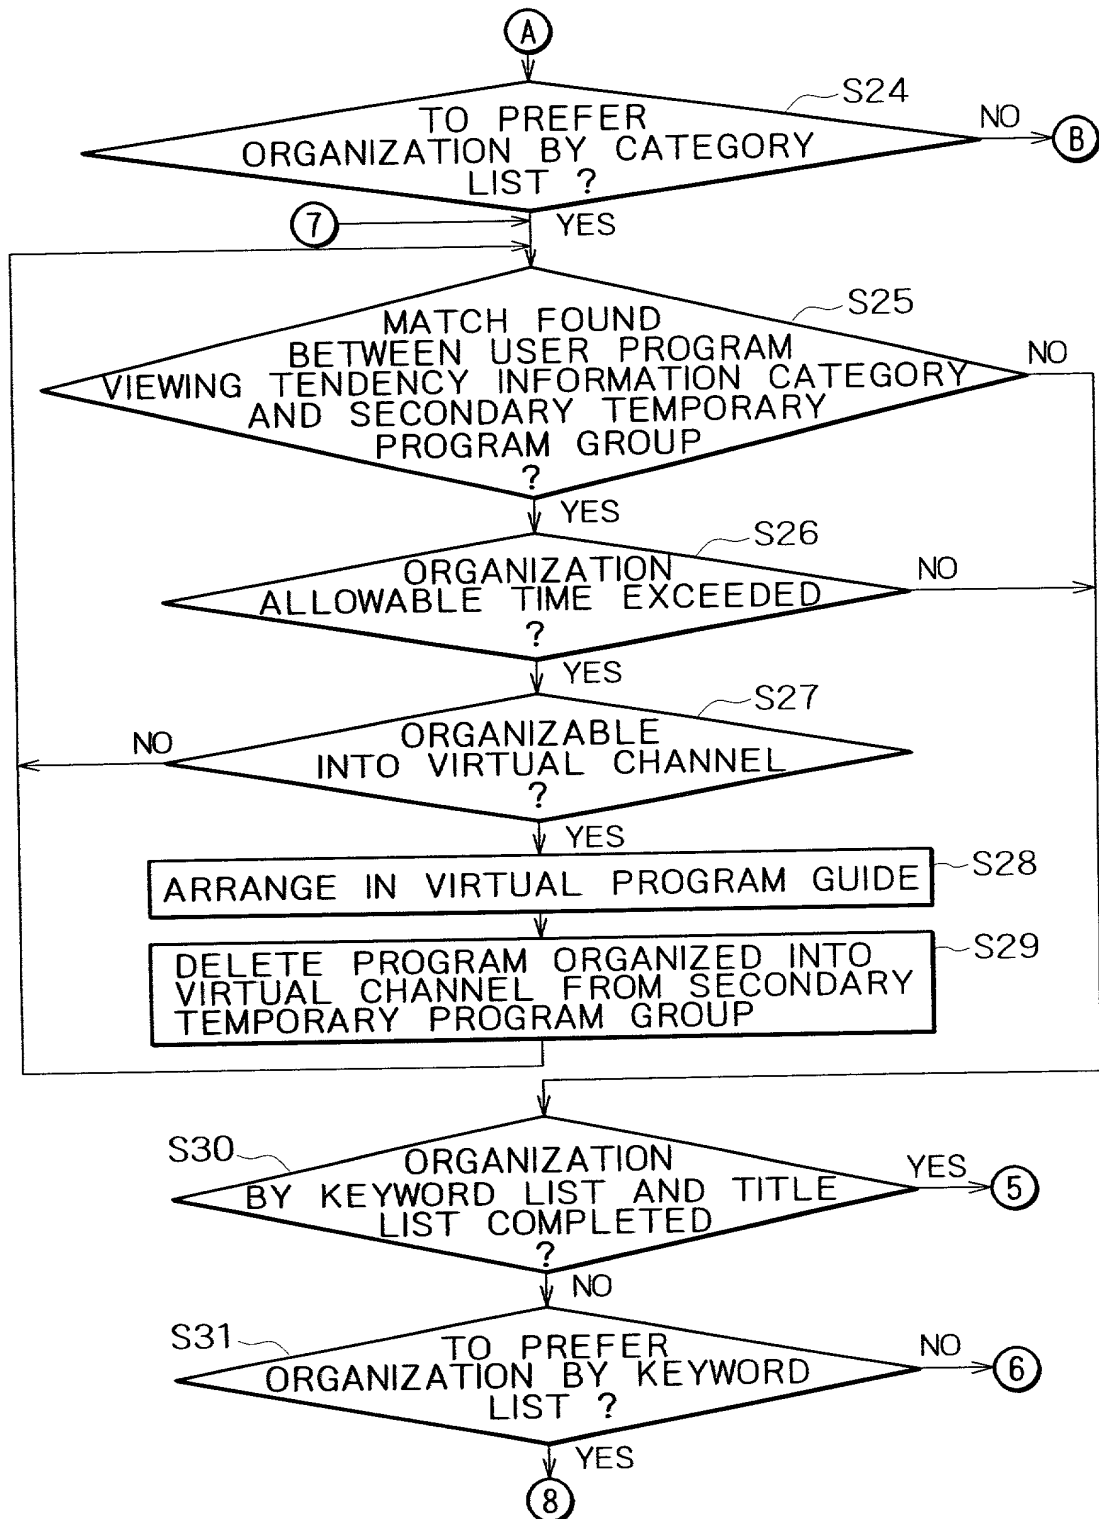

Figure 1 shows the results of the first two steps of the analysis. The first step was a principal component analysis (PCA) of the 10 variables. The results of the PCA are shown in Table 1. The first two principal components (PC1 and PC2) accounted for 65.5% of the total variance. The third principal component (PC3) accounted for 10.5% of the total variance. The fourth principal component (PC4) accounted for 8.5% of the total variance. The fifth principal component (PC5) accounted for 7.5% of the total variance. The sixth principal component (PC6) accounted for 6.5% of the total variance. The seventh principal component (PC7) accounted for 5.5% of the total variance. The eighth principal component (PC8) accounted for 4.5% of the total variance. The ninth principal component (PC9) accounted for 3.5% of the total variance. The tenth principal component (PC10) accounted for 2.5% of the total variance.
